GRASSES - YUCCAS - ROSES - VINES
HEDGES - FLOWERING SHRUBS
SHADE AND ORNAMENTAL TREES**

Since 1884 when our business was founded, the chief aim of its management has been to produce and sell *Quality Nursery Stock*.

This year we do have a fine assortment of lining-out stock, evergreens, shade trees, shrubs, vines, hedging and roses.

Business is Good, and most of our customers with whom we have talked or corresponded are expecting a good volume of orders at reasonable prices.

Our Service will be the best it is possible for us to maintain under the present and future conditions. Many of our men are in the armed forces; others are engaged in vital defense industries. We still have a good force of experienced, capable men, however, and plenty of supplies on hand to take care of your needs.

Our prices are stable—you can depend on them until June, 1943, as long as we have the items available.

LINING-OUT STOCK

SAVE LABOR

Use our heavy **field-grown liners** or **pot plants** and plant direct into the field.

We have a fine assortment of Junipers, Arborvitae (both Oriental and American varieties), Broadleaved Evergreens, and some Shrubs.

OUR ROOTED CUTTINGS are extra heavy and many nurserymen plant them direct into the field, while others grow them in beds for one season.

Well packed and properly graded.

30 or more at 100 rate.

300 or more at 1000 rate.

CUPRESSUS Fastigiata Worthiana:	Worthiana Italian Cypress
Very superior strain of symmetrical upright growth, and much hardier than other cypresses. The parent tree on our grounds is twenty years old and has never been injured by cold when all other specimens were either killed outright or severely damaged by the	

severe cold spells we have had every four or five years. Young plants propagated from this stock were uninjured in the field while other stock was killed. Every tree handsome and uniform in its growth. Maximum height 20 feet.

GOLDFLAME Honeysuckle:
(Name Trade-marked)

A superlative variety; beautiful, hardy and versatile. The large flame-coral trumpets lined with gold, fragrant after nightfall, appear in immense, showy clusters the same year the plant is set out. Reaching its full glory of bloom in early summer, it nevertheless flowers abundantly from May until frost. Dark blue-green foliage, disease and pest free, is attractive in itself and makes a perfect background for the brilliance of the flowers. Allowed to grow naturally, Goldflame will climb a trellis or spread as a ground cover; pruned it becomes a striking specimen shrub, while if planted in a row and sheared it gives a smashing effect as an everblooming hedge.

HETEROPTERIS Glauca:**Red Wing**

A native of South America. One of the most attractive and colorful shrubs in our country. Yellow blossoms in sprays with red seedpods that cling to the stem give a profusion of color the entire summer, regardless of the heat and dry weather. Ideal for use in landscape work where a small flowering shrub is required. Can be trimmed often without affecting its beauty. Fine for cut flower, keeping several days after cut.

Fine textured leaves, bring red flowers and heavy fruit, all on the plant at one time, combine to give a very pleasing effect. A fine plant for landscape work but not so good for retail sales yards because it is usually dormant during the spring selling season. Mature height about 5 feet.
